

OPPORTUNITIES FROM CHINA'S ACCESSION TO THE WTO

Mississippi

The U.S.-China Bilateral Agreement on China's accession to the WTO opens an important market to Mississippi's exports, benefitting key industries and creating export and employment opportunities. The importance of exports to China and the benefits of the Agreement for Mississippi and its key industries are outlined below.

Export Profile

Mississippi's merchandise export sales to China totaled \$6.1 million in 1998, up 24 percent from the \$4.9 million sold to China in 1993.

China ranked as Mississippi's 31st largest export market in 1998.

Mississippi's exports to China are becoming more diversified with 1998 exports to China encompassing 19 product groups—more than double the nine product groups exported in 1993. Two of these product sectors registered export sales exceeding \$1 million in 1998.

Included in these increased Mississippi exports were sales to China from businesses located in the Jackson, MS, metro area worth \$774 thousand in 1998.

Sector Snapshot

U.S. farmers no longer will have to compete with export subsidies on China's agricultural products. China has agreed also to eliminate sanitary and phytosanitary barriers that are not based on sound scientific evidence, such as the restrictions on meat and poultry. In addition, exporters will benefit from broadening the right to import and distribute imported products in China and from tariff cuts on a wide range of products including beef and poultry products. Also, China will end its import monopoly for bulk commodities and establish large low-duty tariff-rate quotas for cotton and soybean oil. Soybean oil will be totally removed from state trading in six years.

As a result of the Agreement, Mississippi's key export sectors benefit from reduced tariffs in China, strong intellectual property protection and improved trade rules protecting U.S. industries against unfair trade practices and removing burdensome obstacles, including:

- Tariff elimination for information technology products; furniture. Major tariff reductions for wood products, paper, agricultural equipment including

husbandry equipment, scientific and measuring instruments, medical equipment, civil aircraft and parts, pumps and compressors, construction equipment, rubber working machinery, and air conditioning equipment.

- Low tariffs for most chemicals at WTO harmonization rates.
- Elimination of import restrictions for products such as civil aircraft and construction and medical equipment.

The agreement will open the market for a wide range of services, including telecommunications, banking, insurance, financial, professional, hotel, restaurant, tourism, motion pictures, video distribution, software entertainment distribution, periodicals distribution, business, computer, environmental, and distribution and related services.

Mississippi Increased Its Exports to China by 24 Percent From 1993 to 1998

Key Industry Benefits

Chemicals

This sector includes chemicals and chemical products such as cosmetics, pharmaceuticals, agricultural chemicals, resins, and plastics. China will reduce average tariffs on chemicals by more than half to an average rate of 6.9 percent by January 1, 2005. All priority U.S. chemical exports, as well as all products in the Chemical Tariff Harmonization Agreement of the Uruguay Round (CTHA) are included in the tariff reductions. In addition, China will eliminate all quotas on chemical products by 2002. Trading rights will be phased in over three years from accession for most chemicals. China will not apply or enforce export performance or local content requirements as a condition for importation or investment approval. China has agreed to apply tariffs uniformly and all taxes equally to domestic and foreign chemical product businesses. This will alleviate the uncertainty associated with China's inconsistent application, refund, and waivers of its 17 percent value added tax.

Agriculture Equipment Including Husbandry Machinery and Tractors

China will reduce the average tariff on agriculture equipment from 11.5 percent to 5.7 percent, and the tariffs on high priority products to 3 percent and 4 percent by January 1, 2002. For husbandry machinery, tariffs will be cut to an average rate of 7.3 percent by 2003, with most cuts by 2000. For tractors, tariffs will be cut to an average rate of 7.3 percent by 2004. Trading and distribution rights for agriculture equipment will be phased in over three years, while tendering requirements for non-government purchases will be eliminated within one year of its accession into the WTO. China will not apply or enforce export performance or local content requirements as a condition for importation or investment approval. China has agreed to apply tariffs uniformly and all taxes equally to domestic and foreign agriculture equipment busi-

nesses. This will alleviate the uncertainty associated with China's inconsistent application, refund, and waivers of its 17 percent value added tax.

Civil Aircraft and Parts

This sector includes civil aircraft and parts listed in Annex I of the Agreement on Civil Aircraft. China will reduce tariffs on all items in the Annex from an average rate of 14.1 percent to an average bound rate of 8.1 percent. Most reductions will be completed by January 1, 2002. At the time of WTO accession, China will eliminate all quotas and licenses for civil aircraft products. Trading and distribution rights for civil aircraft products will be phased in over three years. China has agreed that it will not condition import or investment approvals on technology transfer, or on conducting research and development in China. China has agreed that importation and investment will not be conditioned on providing offsets or local content.

Information Technology

China will eliminate its duties for all information technology products, as defined by the WTO Information Technology Agreement (ITA), by January 1, 2005. These products include electronics, computers, fiber optic cable, and other telecommunications equipment. The current duties on information technology products average over 13 percent. All quotas on ITA products will be eliminated at the time of China's WTO accession. Within four years of its accession into the WTO, China will eliminate its tendering requirements for non-government purchases of ITA products. Trading and distribution rights for ITA products will be phased in over three years. China has agreed to apply tariffs uniformly and all taxes equally to domestic and foreign ITA businesses. This will alleviate the uncertainty associated with China's inconsistent application, refund, and waivers of its 17 percent value added tax. China has agreed that it will not condition import or investment approvals on technology transfer, or on conducting research and development in China.

Wood Products

Spurred by the elimination of certain tariffs on logs and lumber in the 1990s, China has emerged as the world's third largest wood importer. U.S. value-added wood exports to China are at record levels. China will reduce tariffs on wood and wood products to an average of 4.6 percent by January 1, 2004. Tariffs on plywood will drop from 15 percent to 4 percent. Existing tariffs set at 18 percent on particleboard, oriented strandboard, doors, windows, and flooring will drop to 4 percent, and fiberboard tariffs, currently ranging from 12 percent to 18 percent, will drop to 4 to 7.5 percent. If WTO members agree to and adopt the forest products sectoral initiative that originated in APEC, China has agreed to join this initiative and eliminate its tariffs on wood and other forest products.

For wood products, China has agreed to provide treatment to the United States on par with China's preferential programs for other countries. Trading and distribution rights for wood and wood products will be phased in over three years. China has also agreed to eliminate sanitary and phytosanitary barriers that are not based on sound science. Also, China has committed not to impose import quotas on wood and wood products.

Cotton

China is the world's largest consumer and producer of cotton, and one of the largest overseas markets for U.S. cotton. Under its WTO accession agreement, China will establish a tariff-rate quota (TRQ) on cotton of 743,000 metric tons, which will grow to 894,000 metric tons by 2004. Imports under the TRQ will be charged a nominal 1 percent tariff and private traders will be permitted to handle two-thirds of imports under the TRQ. In calendar year 1999, China imported 46,000 metric tons of cotton from all countries. China's commitment to end export subsidies will reduce its price competitiveness in other markets.

Poultry Meat

With imports accounting for 12 percent of total consumption, China is already the second leading market for U.S. poultry meat exports. Under its WTO accession agreement, China will cut its tariff in half (from 20 percent to 10 percent) by 2004 for frozen poultry meat cuts. There will be no quantity limits at these tariff levels. As a result of the 1999 U.S.-China Agreement on Agricultural Cooperation, China agreed to accept all poultry meat from the United States that is certified wholesome by USDA.

Soybeans and Products

China is the world's largest growth market for soybeans and products, and has taken important steps under its WTO accession agreement to open its market to these products. Tariffs will be bound at a low 3

percent on soybeans and 5 percent on soybean meal with no quota limits. For soybean oil, the tariff will drop to 9 percent, and the tariff-rate quota and state trading will be eliminated by 2006.

Beef

China currently imports very little beef, but income growth and rising demand from urban centers are expected to result in significantly increased demand for imports. Under its WTO accession agreement, China will lower its tariff from 45 percent to 12 percent on frozen beef and from 45 percent to 25 percent on chilled beef by 2004. Tariffs on variety meats will be lowered from 20 percent to 12 percent. There will be no quantity limits at these tariff levels. As a result of the 1999 U.S.-China Agreement on Agricultural Cooperation, China agreed to accept all beef from the United States that is accompanied by a USDA certificate of wholesomeness.

Trade Stories

Monticello Hardwood (Monticello) employs more than 90 people. The company has a multifaceted marketing strategy for the Chinese market. It has exported kiln-dried hardwood lumber to China through Hong Kong and Taiwan for about three years and recently has also exported directly to China. In addition, Monticello Hardwood sells its products to large U.S. forest products manufacturers which then sell the end products to China. The lumber is used primarily for furniture, moldings, and flooring in China.

Sanderson Farms (Laurel) has 6,500 employees in Mississippi. Exports are 12 percent of Sanderson Farms' revenues. With exports to China for six years, the company sells about 20 containers a month to China, primarily mid-wing joints, bulk drumsticks, and chicken feet. One obstacle to increased business for Sanderson Farms is the current high tariff on drumsticks. Sanderson expects increased market access for its products when China joins the WTO and implements a tariff cut of 50 percent for poultry parts.

ROLE OF SMES IN EXPORTS TO CHINA

Small and medium-sized enterprises (SMEs) are responsible for a growing share of U.S. exports to China.

- In 1997, SMEs generated 35 percent—more than one-third—of all U.S. merchandise exports to China. This figure is up significantly from a 28 percent share in 1992.
- The 35 percent SME share of the China market in 1997 was higher than the SME share of overall U.S. merchandise exports (31 percent) in that year.
- Forty percent of all firms exporting from Mississippi to China in 1997 were small or medium-sized enterprises (fewer than 500 employees).

Small & Medium-Sized Companies Account for 40 Percent Of All Firms Exporting From Mississippi to China

30 companies exported merchandise from Mississippi to China in 1997

Overview of China WTO Accession Benefits to the United States

The Agreement is a one-way deal that will open China's now largely closed market to U.S. exports. By enacting Permanent Normal Trade Relations (PNTR), the United States is merely maintaining the market access policies it already applies to China. If Congress enacts PNTR, the agreement is expected to provide a substantial boost for U.S. exports. If Congress fails to pass PNTR, American companies, workers and farmers will be denied the great bulk of benefits of the agreement the United States already negotiated—including broad new market access for critical services such as telecommunications and distribution, strong import protections, and the right to enforce China's commitments through WTO dispute settlement. Failure to enact PNTR means fewer U.S. exports to China. U.S. competitors in Europe, Asia and elsewhere will gain market share at the expense of U.S. exporters as these countries will enjoy the full benefits of China's market opening WTO commitments.

Deep cuts for tariffs in manufactured products sectors¹ affecting most U.S. exports—averaging an across-the-board 60 percent cut in tariffs for industrial products. Important gains include a 62.5 percent cut in tariffs for pulp, paper and printed material and elimination of tariffs for information technology products including electronics, telecommunications equipment, and computer equipment.

Tariff bindings for every sector. U.S. industries gain greater certainty of access with China's commitment not to raise tariffs on any products above the negotiated ceiling (bound) rates.

Huge reduction in paperwork costs—a boon to smaller exporters. Simplification, harmonization of customs procedures and licensing will slash costs of processing export orders.

Elimination of quotas and non-automatic licenses for all manufactured products by year 2005. Only a handful of quotas will remain after year 2003. While quotas are being phased out, the quota level will be higher than our current export levels and will increase by 15 percent each year until the quota is eliminated.

By joining the WTO, China is committing to establish a tariff-only import regime for **agricultural products**; all non-tariff barriers will be eliminated. Any other measure, such as inspection, testing, and domestic taxes, must be applied in a manner that is consistent with WTO rules requiring a transparent and nondiscriminatory system. All health-related restrictions must be based on sound science.

China also committed to implementing **agriculture tariff-rate quotas (TRQs)** on economic rather than political criteria. These commitments are designed to ensure a transparent and consistent system for allocating shares of the TRQ to end users and provisions to

ensure that quota-holders are not impeded in utilizing their allocations.

China has committed not to use **export subsidies** for agricultural products when it joins the WTO. This commitment is particularly useful for China's potential exports of corn, rice, and cotton, which in the past have displaced U.S. product from third-country markets.

Bilaterally, China agreed to the terms for removal of scientifically unjustified restrictions on importation of U.S. **wheat and other grains, citrus and meat.**

Foreign exchange balancing requirements—which link a company's level of imports to its level of exports—will be eliminated upon accession. This allows U.S. companies to make market-driven decisions about what to import and export instead of decisions driven by the Chinese government.

Local currency banking will be allowed starting with foreign clients upon accession, followed by Chinese enterprises two years after accession and Chinese individuals five years after accession. Foreign currency business will be allowed without geographic restrictions upon accession. China currently limits foreign banks to foreign currency business in selected cities.

Foreign securities firms may currently only trade in a limited number of stocks designated for foreign investors and then only via shared commissions. Upon accession, China will allow foreign firms to trade these shares with no Chinese intermediary. By three years after accession, foreign entities may establish securities joint ventures (JVs) with a minority equity share for foreign investors to underwrite all shares and corporate and government debt, and trade all these securities except those equity shares restricted to Chinese investors. Also upon accession, foreign entities may establish minority JVs to manage assets of all sorts.

Insurance licenses will be granted on a prudential basis, without numerical restrictions or discretionary economic needs tests. China currently only allows selected foreign companies (including four U.S. companies) to operate in China on a limited basis in only two cities.

Majority equity share for foreign non-life insurance entities will be permitted upon China's accession. Wholly owned subsidiaries will be allowed two years after accession. Life insurance joint ventures will be permitted at 50 percent equity share upon accession.

Easier access to and more control of distribution systems in China allowing U.S. companies to operate commission agents' services, franchising services, wholesaling, retailing and direct sales of their own products in three years post accession for almost all products.

Foreign companies will also be permitted greater control and access to other services related to distribution, including maintenance and repair, rental and leasing, advertising, technical testing and freight inspection, packaging, courier, storage and warehousing, and freight forwarding agency services.

The right to trade (import and export) will be permitted for almost all products within three years of accession. Currently, the right to trade is strictly limited; only companies that receive specific authorization or who import goods to be used in production have such rights.

Telecommunications services are currently not permitted to be supplied by foreigners in China. However, with its accession, China has agreed to allow foreign participation for both value-added and basic services. China has also agreed to undertake all the obligations contained in the WTO Reference Paper on pro-competitive regulatory principles. Telecom services which foreigners can supply under the Agreement include e-mail, voice mail, online information and database retrieval, facsimile, paging, cellular, and internet services via any technology including satellites.

Professional service providers will now be permitted to operate in China and receive national treatment for accounting, auditing, bookkeeping, management consulting, legal, tax consulting, architectural, engineering, and computer services.

The elimination of local content requirements will result in better access for U.S. exports and eliminate unfair incentives or requirements to use domestic goods.

U.S. exports and investments will be free from government-imposed conditions such as technology transfer, research and development in China, and offsets. Upon China's accession, such conditions may only be negotiated between the parties to a contract and not imposed or enforced by the government.

U.S. companies can sell their products in China and not be forced to export a certain percentage back to the United States or elsewhere. This eliminates the non-market incentive to use China as an export platform.

State-owned and state-invested enterprises will be required to buy and sell based on commercial considerations, making the purchase process more market-driven and transparent for U.S. companies and will provide new sales opportunities to U.S. firms.

China has agreed to establish **judicial review** procedures for the prompt review of all administrative actions relating to the implementation of laws, regulations, judicial decisions and administrative rulings related to its WTO obligations. The tribunals will be independent of the agencies entrusted with administrative enforcement.

Greatly improved enforcement of China's commitments through the WTO dispute settlement process. The United States will now have allies in other WTO members to address violations of international trade norms.

Current U.S. practice of using a special, non-market economy methodology when calculating dumping margins in **antidumping investigations** involving imports from China will remain in effect for 15 years. Chinese industries will continue to have the burden of proving to the U.S. government that market economy conditions prevail in their industry to avoid application of this methodology.

China will apply its trade-related laws **uniformly** throughout all of China including land and seaports.

China will be required to apply equally the value-added tax (currently at 17 percent for most products) to domestic goods as well as imports under the WTO **national treatment** provisions.

The United States will have access to a **product-specific safeguard mechanism** for 12 years which will allow the U.S. to address more easily any rapidly increasing Chinese imports in a targeted fashion in cases of actual or threatened market disruption to a U.S. industry.

China has agreed to incorporate into the WTO a **textile-specific safeguard** drawn from the U.S.-China Bilateral Textile Agreement.

¹For more information on tariff reductions, see tariff summary table.

ADDITIONAL INFORMATION AND ASSISTANCE

The reports for each of the 50 states are available at www.chinapntr.gov, as well as supplemental information on the benefits of China's membership in the World Trade Organization for U.S. industry and agriculture. Additional information on agricultural products is available from www.fas.usda.gov and speeches and testimony are provided on www.ustr.gov.

For counseling and assistance regarding exporting to China, call the Trade Information Center at 1-800-USA TRAD(E) or the Agriculture FAS Trade Assistance Office at 202-720-7420.

To discuss problems you are experiencing in exporting to China or a Chinese trade barrier you are encountering that is limiting your ability to export, please contact the Commerce Department's Trade Compliance Center. The fastest means to contact the Trade Compliance Center is the internet at <http://www.mac.doc.gov/tcc>. It can be reached also via e-mail (tcc@ita.doc.gov), fax (202-482-6097), or phone (202-482-1191).

¹Average 1997–98 applied duties for each product category. Reductions will be made from the 1997–98 base rate for each tariff line. Most cuts will be made in equal annual increments.

²Average end rate for each product category which will be attained once China phases in all duty reductions agreed bilaterally with the United States. All reductions will be completed by January 1, 2008, with 70 percent of all reductions on industrial goods achieved by 2003 and 98 percent of all industrial duty reductions by 2005. China's agreements with other countries may result in lower rates and shorter staging.

³Includes heaters, ventilators, air conditioners, washers, refrigerators, centrifuges/dryers.

⁴WTO Information Technology Agreement (ITA), implemented in July 1997.
